FIELD RULES 2010

PILOT REQUIREMENTS FOR R/C FLYING

1. VALID MAAC MEMBERSHIP
2. VALID STETSON FLYERS CLUB MEMBERSHIP

Note: Both MAAC and Stetson Memberships are effective 1 January.
You should be prepared to produce both documents any time flying at the field.

PIT AREA AND PILOTS:

1. ALL non-2.4 Ghz transmitters in the impound stand when not in use.
2. Do not switch on or remove non-2.4 Ghz TX from the impound unless you have proper frequency pin installed on frequency control board. The definition of a "proper" frequency pin is 5/8" high by 2 7/8" wide and covers one frequency "slot" on the control board. The frequency pin must also indicate your name, frequency, and your valid MAAC number. Wide band radios are not to be used.
3. ONLY FIVE (5) AIRCRAFT in the air at any one time.
4. Direct your slipstream away from other models and pilots.
5. All aircraft must be restrained when running engines in the pits.
6. No taxiing into or out of pit area.
7. No flying with fuel burning models before 9:00 AM any day of the week.
8. Observe posted take off and landing directions.
9. Flying over the pits or visitors observation area is not permitted.
10. All MAAC safety regulations are to be followed. Copies available from the Club or from the MAAC web site at www.maac.ca.
11. All engines must have mufflers.
12. No alcohol and flying.
13. Children must be properly supervised.
14. Pets allowed in parking lot only, in a vehicle or on a leash. Not in the spectator area. Please practice "poop and scoop".
15. The trailer door and gate chain must be locked by the last person to leave the field.
16. ALL GARBAGE MUST BE REMOVED WHEN YOU LEAVE THE FIELD.
