

This guide was developed to assist in the installation of Phoenix R/C 5 version of the Stetson Flyers Flying Field v1.0. By Bob Sintzel ([bob.sintzel@rogers.com](mailto:bob.sintzel@rogers.com)).

Note: A special 'thank you' to Hal MacDonald, Nigel Chippindale, Jim Denyer, John Stewart and Daniel Marcotte for their contributions.

#### Installation Steps:

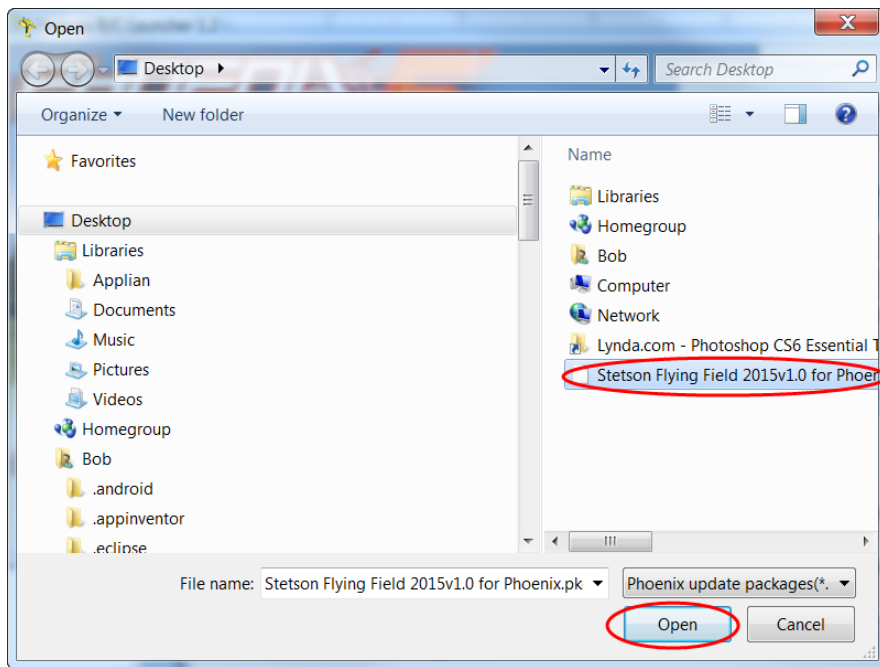

1. Download the Stetson Flying Field 2015v1.0 for Phoenix.pkg file (desktop recommended).
2. Launch Phoenix R/C 5 and click on the advanced button (shown below)

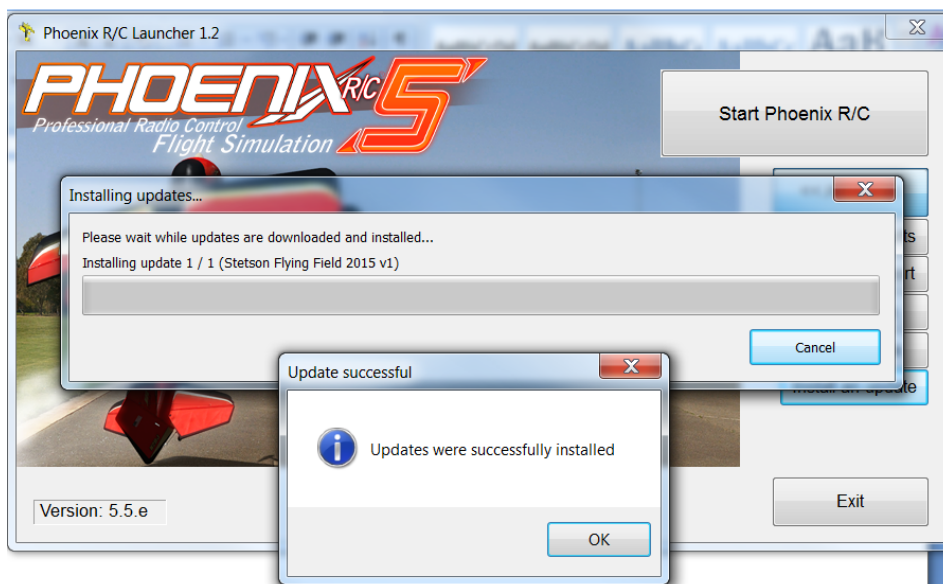

3. Click the 'Install an Update' button as shown below

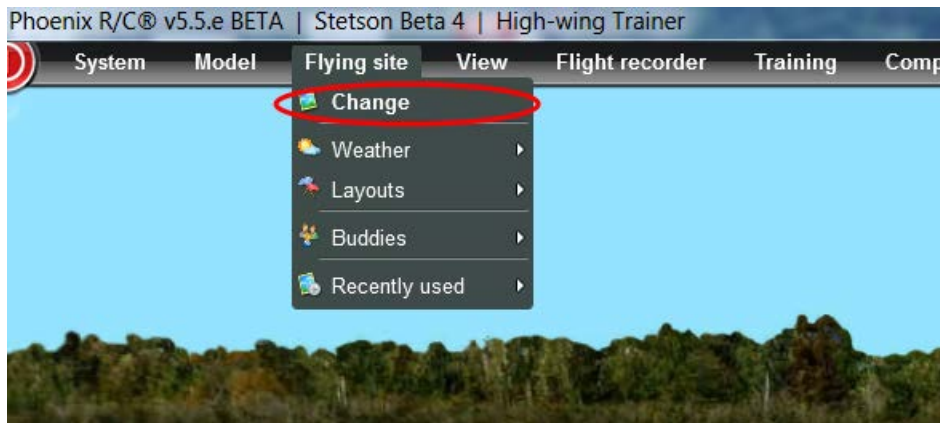

A new 'Open' dialog box will appear. Locate the Flying Field 2015v1.0 for Phoenix.pkg file on your desktop, click on it to select it then click the 'open' button, as shown below:

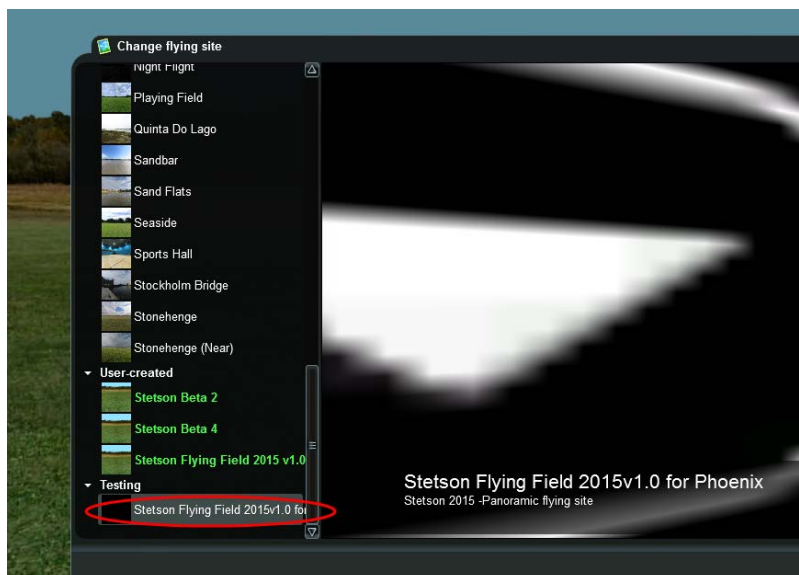

4. You should see the following notifications if all went well:

5. Click the 'OK' button. You have successfully imported the Stetson Flying Field 2015v1.0 for Phoenix simulation.
6. To use the Stetson Flying Field 2015v1.0 for Phoenix simulation, you must now select and load it. To do so, Select 'Flying Site/Change, as shown below:

7. Select 'Stetson Flying Field 2015v1.0 for Phoenix' as shown below:

8. ENJOY YOUR FLIGHT 😊
