

## Setson Field 2014

This is a Real Flight 7 version of the Stetson field using RF objects from Add-ons 1 to 5 and various expansion packs.

Because of the large amount of foliage, trees and tall grass surrounding the runways it is a large file and therefore it takes time to load.

There are 3 pilot spawns, 2 are along the East West runway and one along the North South runway (where heli pilots usually fly).

There is a plane spawn at each end of the East West runway and an heli spawn on the North South runway.
